

- 01 You will be required to update your parameters periodically.
- 02 Parameters for your aquariums will appear under Tank Details > Parameters.
www.reefware.com/tank/parameters
- 03 To update your aquarium, go to “Update Levels” at the top of the page.
- 04 Select which aquarium you will want to update from the Aquatic System dropdown menu.
- 05 Slide the level sliders to the appropriate values for each of the aquarium parameters.
(You can also manually enter the value directly under each slider)
- 06 If you use a controller, the slider will automatically adjust to the most current reading.
- 07 After adjusting all the sliders, click “Save Parameters” at the top of the page.
- 08 Your parameters have successfully been updated and the interactive charts will be updated accordingly.
